Introduction & Features

Thank you for your purchase of one or more of the vehicles in the all new 2021 Valor Pack Remastered! Your support is truly appreciated and does not go unnoticed. Here are some notes before diving in!

- All lights are individually templated w/ siren labels. This goes for all of the glass, and bodys of course. This allows for full, customizability on the user level, hence there only being one base version included instead of multiple.
- All vehicles are equipped with a plethora of vehicle modkits! This allows for even more multi-function capability, and different options from wraps, antennas, alprs, and toggleable interior equipment.
- Almost every vehicle has wheel modkits as well. This allows for tons of wheel options on vehicles, and are addon wheels for easy implementation.
- Split the visor bar into 2 separate extras - 1 for the passenger side, 1 for the driver side, allowing even more of a “detective” look if desired.
- The spotlight, just like the NFORCE Pack, is moveable via the numpad keys, or shift and control. This time we went with a brand new spotlight head unit!
- Included is 2 versions, Setina & Westin Rambar versions, different spawncodes labeled with “s” or “w” at the end of the yft name.
- 3 Skins included once again!
- Liberty Pack bike script works with this pack as well.
- The lightbar feet are a modkit option, you can either use regular feet, ALPR feet, or no feet if your lightbar is not toggled.

Sedan Features, Extras, and Modkits

As mentioned, this pack has not only extras, but modkit capability, one of the first on the market to do on a mass pack scale. Below are the generic modkits, as they vary between vehicle, along with wheel options, and extras.

- Extra 1- Lightbar
- Extra 2- Dash Light
- Extra 3- Passenger Side Visor
- Extra 4- Driver Side Visor
- Extra 5- Rambar
- Extra 6- Small Antenna & Puck
- Extra 7- Trunk Puck
- Extra 8- Spotlight
- Extra 9- Interior Radar
- Extra 10- Interior Laptop
- Extra 11- Dashcam
- Extra 12- Rear Deckbar

Modkits are accessible via most menu's and trainers under Vehicle Options > Vehicle Mods. Categories do not necessarily reflect where the modkits are located on the vehicle. Categories & Modkits can vary between vehicles.

Sedan Features, Extras, and Modkits (cont.)

ROOF - No Lightbar Feet ; Regular Valor Feet ; ALPR Valor Feet

SPOILER - Bikerack on ; Bikerack off

TRIM - Partition on ; Partition off

BONNET - No Wrap ; PB-5 Wrap ; PB-6 Wrap ; PB-8 Wrap (**2 WRAPS ON WESTIN**)

RIGHT WING - No Antenna ; Medium Antenna ; Large Antenna

LEFT WING - No Antenna ; Small Antenna ; Medium Antenna ; Large Antenna

WHEEL OPTIONS PER VEHICLE

2018 Charger (Muscle Category)

6 Options

2014 Charger (Muscle Category)

6 Options

2011 CVPI (SUV)

7 Options

2016 FPIS (Sports Category)

4 Options

2013 Caprice

No Wheel Options

Notes- 2014 Charger has Front & Rear bumper cosmetic modkit options.
This changes the order of the modkits & may have more categories.

SUV Features, Extras, and Modkits

The SUV's have a bit more features then the sedans. With more room for equipment, we were able to pack some awesome things in the back, and they also feature more lighting then the sedans, which allows for better visibility in general.

- Extra 1- Lightbar
- Extra 2- Dash Light
- Extra 3- Passenger Side Visor
- Extra 4- Driver Side Visor
- Extra 5- Rambar
- Extra 6- Small Antenna & Puck
- Extra 7- Rear Puck
- Extra 8- Spotlight
- Extra 9- Interior Radar
- Extra 10- Interior Laptop
- Extra 11- Dashcam

FRONT BUMPER - Grille Accessories (Depending on vehicle)

REAR BUMPER - Mudflaps (Depending on vehicle)

CHASSIS - Partition on ; Partition off

BONNET - No Wrap ; PB-5 Wrap ; PB-6 Wrap ; PB-8 Wrap (**3 WRAPS ON WESTIN**)

ROOF - No Antenna ; Medium Antenna ; Large Antenna

TRUNK - No Antenna ; Small Antenna ; Medium Antenna ; Large Antenna

ARCH COVERS - No ALPR's ; Trunk ALPR's ; Lightbar ALPR's

ARIELS - Bikerack on ; Bikerack off

TRIM - Rambar on ; Rambar off

WHEEL OPTIONS PER VEHICLE

2018 Tahoe (SUV Category)

5 Options

2018 Suburban (SUV Category)

5 Options

2016 FPIU (SUV Category)

2 Options

2006 Tahoe

No Wheel Options

Notes- 2016 FPIU Has Interceptor Badge, and Bug Guard. Suburban and Tahoe (2018's) have 2 grille options being the Honeycomb black and Chrome Horizontal. Mudflap options on the Suburban , Tahoe, and FPIU. This changes the order of the modkits & may have more categories. Other features include the openable rear compartment.

Truck Features, Extras, and Modkits

The Truck is one of our personal favorites. This time we decided to include one truck in the pack, being the 2018 F150. This thing has a ton of options, it can be used as regular patrol, commercial vehicle enforcement, even swat, whatever your combinations bring!

- Extra 1- Lightbar
- Extra 2- Dash Light
- Extra 3- Passenger Side Visor
- Extra 4- Driver Side Visor
- Extra 5- Rambar
- Extra 6- Openable Bedcap
- Extra 7- DECKED Bed Drawer
- Extra 8- Spotlight
- Extra 9- Interior Radar
- Extra 10- Interior Laptop
- Extra 11- Interior Dashcam
- Extra 12- Rear Bedcap Visor Bar

SPOILER - Bikerack on ; Bikerack off

FRONT BUMPER - Black Plastic Front Bumper & Grille (No Foglight) ; Chrome Bumper & Black Grille ; Chrome Bumper and Grille ; Black Plastic Front Bumper & Grille (Foglight)

REAR BUMPER - Black Plastic Rear Bumper ; Chrome Bumper

TRIM - Partition on ; Partition off

BONNET - No Wrap ; Full Wrap (**2 WRAPS ON WESTIN**)

LEFT WING - No Antenna ; Medium Antenna ; Large Antenna

RIGHT WING - No Antenna ; Small Antenna ; Medium Antenna ; Large Antenna

TRUNK - No ALPR's ; Black Roof ALPR's ; White Roof ALPR's

ARIELS - Bikerack on ; Bikerack off

ROOF - No Lightbar Feet ; Regular Valor Feet ; ALPR Valor Feet

TANK - Toolbox on ; Toolbox off

TRIM - Backrack on ; Backrack off

WHEEL OPTIONS PER VEHICLE

2018 F150 (Offroad Category)

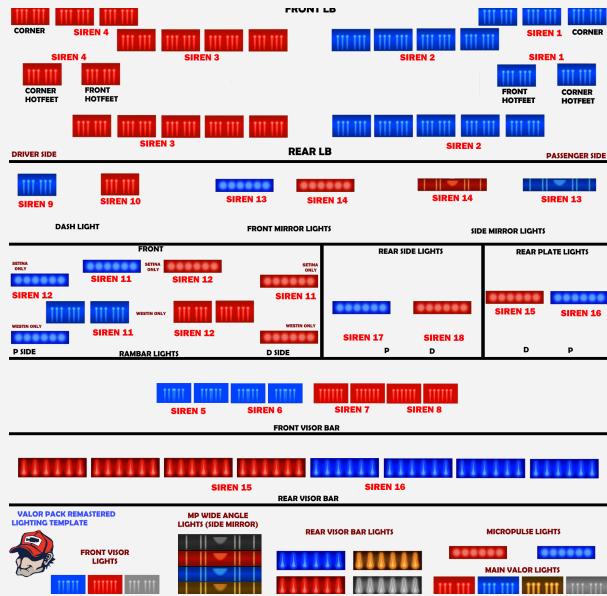

3 Options

Notes- The F150 has a toggleable DECKED Cargo organizer. This may be buggy at times in non-synced servers, which there is no current way around this in multiplayer GTA. Bedcap opens with cargdoor.

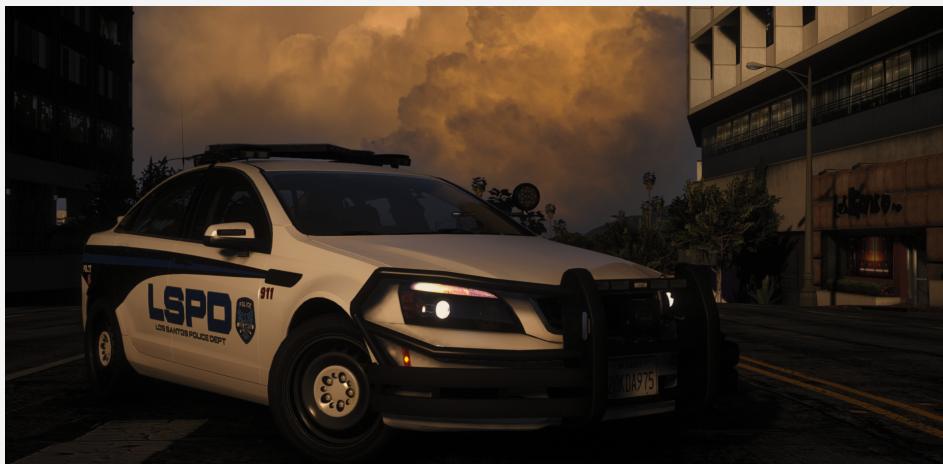

Lighting Template, & How to use it.

For those who have never seen one, a lighting template is something new we have started here, starting with the ambos, that allows full customizability by the user to change any light module to any color they want. This allows-

- *Endless Lighting Setups*
- *Accurate representations of Departments*
- *Unique and different setups from other servers or departments*

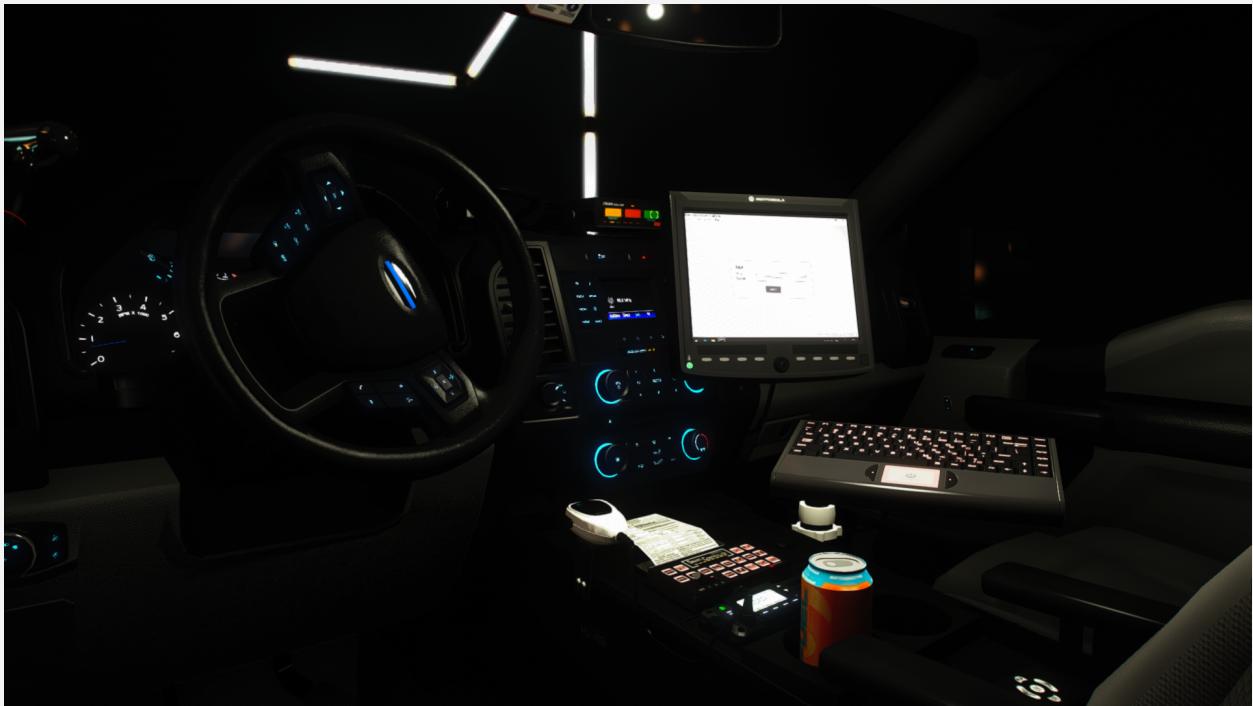

Shown above is the lighting template that is included in your pack. There are 4-5 different lighting templates, labeled for different vehicles as there is a difference in light setups, and light modules. The instructions are pretty clear, use any sort of photo editing program whether it's Photoshop , Paint.net, or Gimp, it doesn't matter. Select and copy the modules from the "pallet" on the bottom left, drag them over the desired modules you would like! The template is setup similar to how it is implemented on the vehicle, so figure the visor bar is setup a split Left Blue, Right Red, it correlates the same direction ingame. Pretty simple concept once you get it down! They are also labeled with siren numbers, so you can mirror the color in carcols!

How to use YTD & +hi YTD:

I figured I'd get asked why there are 2 YTDS. The reason is for better texture optimization. The +hi will be utilized for bigger textures, mainly skins or anything over 2k. With skins, you throw your 4k (or 2k) skins in the +hi, and the 1k version in your regular YTD. This allows for better LOD performance with textures and increases performance for the server and client. You will see this utilized already in the release and how the base skins are sorted in folders in your files you get.

Conclusion

Well, the Remasters continue! Thank you for your support, suggestions, pointers, and sticking with us thru the changes, challenges, and transitions. We strive daily to deliver the best product on the market and pride ourself in what we create, without you, this wouldn't be possible! We hope you enjoy this pack, and any other products you buy from us, and if you have any suggestions, bugs, or whatnot, be sure to speak up in our discord! Thank you for your support, enjoy!
